## FIREARM DEATHS: CHAMPAIGN COUNTY 2012-2020

All the data was queried from the Ohio Department of Health Public Health Information Warehouse. The Ohio Department of Health specifically disclaims responsibility for any analysis, interpretations, or conclusions.

## **OVERVIEW**

From 2012-2020, there were a total of 43 deaths that involved the use of a firearm.

The trend of firearms involved with a death is slightly increasing from 2012 through 2020 (Figure 1).

Most of the firearm deaths from 2012-2020 were suicides (88.4%) and homicides accounted for 9.3% of firearm deaths from 2012-2020 (Figure 2). In 2020 alone, suicide and legal intervention or war accounted for the same (50.0%) amount of firearm deaths (Figure 2). Legal intervention or war is defined by injuries inflicted by the police or other law enforcing agents.

Overall, the age group that was involved the most with firearm deaths was the 45-54 and 75-84 year old (18.6%) age groups. Those involved with a firearm death that were deemed to be suicide, had the most deaths in the 45-54 and 75-84 year old (18.4%) age groups (Figure 3).

Those involved with a firearm death that were deemed to be of legal intervention or war, fell within the 25-34 year old age group.
